

Item	Cabin Baggage	Hold Baggage
<b>Oxygen or air</b> , gaseous, small cylinders required for medical use. The cylinder must not exceed 5 kg gross weight	✓	✗
<b>Liquid Oxygen</b> – Units containing refrigerated liquid oxygen.	✗	✗
<b>Stunning devices</b> – devices designed specifically to stun or immobilize, including: -devices for shocking, such as stun guns, tasers and stun batons, -animal stunners and animal killers, -disabling and incapacitating chemicals, gases and sprays, such as mace, pepper sprays, capsicum sprays, tear gas, acid sprays and animal repellent sprays.	✗	✗
<b>Security-tape attaché cases</b> , cash boxes, cash bags, etc. incorporating dangerous goods such as lithium batteries and/or pyrotechnic material.	✗	✗
<b>Ammunition for sporting purposes</b> securely boxed in quantities less than 5 kg (11 lb) gross weight per person for that person's own use, excluding ammunition with explosive or incendiary projectiles. Allowances for more than one passenger must not be combined into one or more packages.	✗	✓
<b>Guns, Firearms and other devices that discharge projectiles</b> – devices capable, or appearing capable, of being used to cause serious injury by discharging a projectile, including: -firearms of all types, such as pistols, revolvers, rifles, shotguns, toy guns, replicas and imitation firearms capable of being mistaken for real weapons,  component parts of firearms, excluding telescopic sights,  compressed air and CO 2 guns, such as pistols, pellet guns, rifles and ball bearing guns,  bows, cross bows and arrows,  harpoon guns and spear guns,  slingshots and catapults.	✗	✓.
<b>Camping stoves and fuel containers that have contained a flammable liquid</b> fuel may be carried provided the fuel tank of the camping stove and/ or fuel container has been completely drained of all liquid fuel and action has been taken to nullify the danger.	✗	
<b>Carbon dioxide, solid (dry ice)</b> , in quantities not exceeding 2.5 kg (5 lb) per passenger when used to pack perishables not subject to these Regulations, provided the package permits the release of carbon dioxide gas.	✓	-

<p><b>Mobility aids</b> (e.g. wheelchairs) <b>powered by non-spillable wet batteries</b> for use by passengers whose mobility is restricted by either a disability, their health or age, or a temporary mobility problem (e.g. broken leg).</p> <p>1. The operator must verify that:</p> <p>a. The battery is securely attached to the mobility aid;</p> <p>b. The battery terminals are protected from short circuits (e.g. by being enclosed within a battery container); and</p> <p>c. Electrical circuits have been isolated; To do this, place the device into drive mode (i.e. not freewheel mode), see if the mobility aid will power up and if so whether use of the joystick results in the mobility aid moving. It must also be verified that the circuits of supplemental motorized systems such as seating systems have been inhibited to prevent inadvertent operation, e.g. by the separation of cable connectors. If an electric mobility aid has not been made safe for carriage, it must not be loaded.</p>	X	✓
<p>2. Mobility aids must be carried in a manner such that they are protected from being damaged by the movement of baggage, mail, stores or other cargo;</p>		✓
<p>3. Where the mobility aid is specifically designed to allow its battery (ies) to be removed by the user (e.g. collapsible):</p> <p>a. The battery (ies) must be removed; the mobility aid may then be carried as checked baggage without restriction;</p> <p>b. The removed battery (ies) must be carried in strong, rigid packaging which must be stowed in the cargo compartment;</p> <p>c. The battery (ies) must be protected from short circuit; and</p> <p>4. The pilot-in-command must be informed of the location of the packed battery.</p>		
<p>4. It is recommended that passengers make advance arrangements with each operator.</p>		
<p><b>5. Mobility aids</b> (e.g. wheelchairs) <b>powered by spillable batteries</b>, for use by passengers whose mobility is restricted by either a disability, their health or age, or a temporary mobility problem (e.g. broken leg). Carriage not permitted (Skyward). Company Regulation.</p>	X	X
<p><b>Mobility aids</b> (e.g. wheelchairs) <b>powered by lithium ion batteries</b>, for use by passengers whose mobility is restricted by either a disability, their health or age, or a temporary mobility problem (e.g. broken leg).</p>		✓
<p>1. The operator must verify that:</p> <p>a. The battery is securely attached to the mobility aid;</p> <p>b. The battery terminals are protected from short circuits (e.g. by being enclosed within a battery container); and</p> <p>c. Electrical circuits have been isolated; To do this, place the device into drive mode (i.e. not freewheel mode), see if the mobility aid will power up and if so whether use of the joystick results in the mobility aid moving. It must also be verified that the circuits of supplemental motorized systems such as seating systems have been inhibited to prevent inadvertent operation. e.g. by the separation of cable connectors. If an electric mobility aid has not been made safe for carriage, it must not be loaded.</p>		
<p>2. Mobility aids must be carried in a manner such that they are protected from being damaged by the movement of baggage, mail, stores or other cargo;</p>		

<p><b>3.</b> Where the mobility aid is specifically designed to allow its battery (ies) to be removed by the user (e.g. collapsible):</p> <p>a. The battery (ies) must be removed and carried in the passenger cabin;</p> <p>b. The battery terminals must be protected from short circuit (by insulating the terminals, e.g. by taping over exposed terminals);</p> <p>c. The battery must be protected from damage (e.g. by placing each battery in a protective pouch);</p> <p>d. Removal of the battery from the mobility aid must be performed by following the instructions of the manufacturer or device owner;</p> <p>e. The battery must not exceed 300 Wh; and</p> <p>f. A maximum of one spare battery not exceeding 300 Wh or two spares not exceeding 160 Wh each may be carried.</p>		
<p><b>4.</b> The pilot-in-command must be informed of the location of the lithium ion battery(ies);</p>		
<p><b>5.</b> It is recommended that passengers make advance arrangements with each operator.</p>		
<p><b>Heat producing articles</b> such as underwater torches (diving lamps) and soldering irons.</p>		X
<p><b>Mercury barometer or thermometer</b> carried by a representative of a government weather bureau or similar official agency.</p>	X	
<p><b>Avalanche rescue backpack</b>, one (1) per passenger, containing a cylinder of compressed gas in Div. 2.2. May also be equipped with a pyrotechnic trigger mechanism containing less than 200 mg net of Division 1.4S. The backpack must be packed in such a manner that it cannot be accidentally activated. The airbags within the backpacks must be fitted with pressure relief valves.</p>	✓	✓
<p><b>Insulated packaging's containing refrigerated liquid nitrogen</b> (dry shipper), fully absorbed in a porous material containing only non-dangerous goods.</p>	✓	✓
<p><b>Small nonflammable gas cylinders</b>, containing carbon dioxide or other suitable gas in Division 2.2. Up to two (2) small cylinders fitted into a life jacket, and up to two (2) spare cartridges per person, not more than four (4) cylinders up to 50 ml water capacity for other devices.</p>	✓	✓
<p><b>Aerosols in Division 2.2</b>, with no subsidiary risk, for sporting or home use.</p>	X	✓
<p><b>Non-radioactive medicinal or toilet articles</b> (incl. aerosols) such as hair sprays, perfumes, colognes and medicines containing alcohol. The total net quantity of all above mentioned articles must not exceed 2 kg (4.4 lb) or 2 L (2 qt), and the net quantity of each single article must not exceed 0.5 kg (1 lb) or 0.5 L (1 pt).</p>	✓	✓
<p><b>Alcoholic beverages</b>, when in retail packaging, containing more than 24% but not more than 70% alcohol by volume, in receptacles not exceeding 5 L, with a total net quantity per person of 5 L.</p>	✓	✓
<p><b>Nonflammable, non-toxic gas cylinders</b> worn for the operation of mechanical limbs. Also, spare cylinders of a similar size if required to ensure an adequate supply for the duration of the journey.</p>	✓	✓
<p><b>Oxygen Concentrators</b>. These are battery or mains powered devices. They are permitted as they do not contain oxygen and no chemical reaction is involved. They filter and concentrate the amount of oxygen in the atmosphere. They may only be powered by battery when on board the aircraft.</p>	✓	✓
<p><b>Underwater diving cylinders/Scuba tanks</b> are permitted for carriage on Skyward Express Ltd aircraft provided all valves are removed and cylinders are empty.</p>	✓	✓
<p><b>Oxygen generators (Chemical)</b>, containing one or more chemicals which, when activated, produce heat to generate oxygen by chemical reaction.</p>	X	X
<p><b>Hair curlers containing hydrocarbon gas</b>. Up to one (1) per passenger or crew-member, provided that the safety cover is securely fitted over the heating element. These must not be used on board the aircraft at any time. Gas refills are NOT permitted for carriage.</p>	✓	✓
<p><b>Medical or clinical thermometer</b>, which contains mercury, one (1) per passenger for personal use, when in its protective case.</p>	X	✓

<b>Radioisotopic cardiac pacemakers</b> or other devices, including those powered by lithium batteries, implanted into a person, or radiopharmaceuticals contained within the body of a person as a result of medical treatment. <b>Note:</b> Not allowed in cabin baggage if not in use.	✓	✗
<b>Safety matches or a lighter</b> with fuel/fluid fully absorbed in a solid and intended for use by an individual when carried on one's person. However, lighters with a flammable liquid reservoir containing unabsorbed liquid fuel (other than liquefied gas), lighter fuel and lighter refills are not permitted on one's person nor in checked or carry-on baggage. <b>Note:</b> "Strike anywhere" matches are forbidden for air transport.	✗	✗
<b>E-Cigarettes</b> , all electronic cigarettes and maximum of two spare batteries in carry-on baggage and on ones person.	✓	✗
<b>Christmas Crackers</b> , 2 boxes per pax provided they are packed in the manufacturer's original packaging. Novelty items contained inside must not include prohibited items.	✓	✓
<b>Explosives and incendiary substances and devices</b> - explosives and incendiary substances and devices capable, or appearing capable, of being used to cause serious injury or to pose a threat to the safety of aircraft, including: ammunition, blasting caps, detonators and fuses, replica or imitation explosive devices, mines, grenades and other explosive military stores, fireworks and other pyrotechnics, smoke-generating canisters and smoke-generating cartridges, dynamite, gunpowder and plastic explosives	✗	✗
<b>Lithium battery powered electronic devices</b> Lithium ion batteries for portable (including medical) electronic devices, a Wh rating exceeding 100 Wh but not exceeding 160 Wh. For portable medical electronic devices only, lithium metal batteries with a lithium content exceeding 2 g but not exceeding 8 g.	✓	✓
<b>Spare Lithium batteries</b> Lithium ion batteries for portable (including medical) electronic devices, a Wh rating exceeding 100Wh but not exceeding 160 Wh. For portable medical electronic devices only, lithium metal batteries with a lithium content exceeding 2 g but not exceeding 8 g. Maximum of two spare batteries in carry-on baggage only. These batteries must be individually protected to prevent short circuits.	✓	✗
<b>Portable electronic devices (including medical devices) containing lithium metal or lithium ion cells or batteries</b> such as watches, calculating machines, cameras, cellular phones, laptop computers, camcorders, etc., when carried by passengers or crew for personal use. Batteries must not exceed 2 g for lithium metal batteries and 100 Wh for lithium ion batteries.	✓	✓
<b>All spare batteries, including lithium metal or lithium ion cells or batteries</b> , for such portable electronic devices must be carried in carry-on baggage only. These batteries must be individually protected to prevent short circuit.	✓	✗
<b>Portable electronic devices containing non-spillable batteries</b> , must be 12 V or less and 100 Wh or less. A maximum of 2 spare batteries may be carried.	✓	✓
<b>Fuel cell systems and spare fuel cartridges powering portable electronic devices</b> (for example cameras, cellular phones, laptop computers and camcorders). Please see note 5 for more information.	✓	✓
<b>Blunt Instruments</b> . Any blunt instrument capable of causing injury, including: baseball and softball bats, clubs or batons (rigid or flexible), cricket Bats/Golf Clubs/Hockey sticks/Lacrosse sticks, fishing rods, martial arts equipment e.g. knuckle dusters, nunchucks, etc.	✗	✓

<p><b>Chemical and Toxic substances.</b> Any chemical or toxic substances which poses a risk to the health of passengers/crew or the security/safety of aircraft or property, including: Poisons  infectious or biological hazardous material. e.g. infected blood, bacteria and viruses</p>	X	X
<p><b>Workmen's tools</b> – tools capable of being used either to cause serious injury or to threaten the safety of aircraft, including: crowbars, drills and drill bits, including cordless portable power drills, tools with a blade or a shaft of more than 6 cm capable of use as a weapon, such as screwdrivers and chisels, saws, including cordless portable power saws, blowtorches, bolt guns and nail guns;</p>	X	✓
<p>Objects with a sharp point or sharp edge – objects with a sharp point or sharp edge capable of being used to cause serious injury, including: -items designed for chopping, such as axes, hatchets and cleavers, -ice axes and ice picks, -razor blades, -box cutters, -knives with blades of more than 6 cm -scissors with blades of more than 6 cm as measured from the fulcrum, -martial arts equipment with a sharp point or sharp edge, -swords, swordsticks and sabres, -ski and walking/hiking pole and crampons, -ice skates, -arrows, darts, harpoons, machetes and spears.</p>	X	✓
<p><b>Hoverboards</b>, also known as <b>Rideables</b> or <b>Segway boards</b></p>	X	X
<p>Baggage (suitcase, rucksack or similar) that contains a <b>lithium battery</b> or <b>power bank</b>, also known <b>Smart Baggage</b></p>
